NALA LOCAL MUNICIPALITY

Service Delivery and Budget Implementation Plan 2009/2010

1. INTRODUCTION

A service-delivery and budget implementation plan (SDBIP) is a detailed plan for implementing a municipality's delivery of municipal services and its annual budget. An SDBIP must indicate –

- (a) projections for each month of revenue to be collected, by source and operational and capital expenditure, by vote;
- (b) service delivery targets and performance indicators for each quarter; and
- (c) other matters that may be prescribed.

The Mayor, in consultation with (i.e. with the concurrence of) the other members of the Executive Committee, must approve the draft SDBIP within 28 days after the Council approved the Municipality's annual budget. As soon as the SDBIP has been approved the Mayor must ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators for each quarter, as set out in the SDBIP, are made public.

The Municipal Manager must submit the draft SDBIP for any year, together with the draft budget for the year to which it relates and other prescribed supporting documentation, to the Mayor, who must table the draft budget, draft SDBIP and other prescribed documents in the Council not later than 31 March. As soon as the draft budget and supporting documentation, including the draft SDBIP, has been tabled it must be published for comment.

The SDBIP is essentially a business plan and forms an integral part of the financial planning process. It provides a means to measure the efficiency of service delivery by linking the financial inputs indicated in the budget to the service outputs and outcomes. The SDBIP also connects the budget to managers' annual performance agreements. It includes detailed information on how the budget will be implemented by means of –

- (a) cash flow forecasts:
- (b) performance indicators; and
- (c) service delivery targets.

2. COMPONENTS OF THE SDBIP

The four primary components of an SDBIP are:

- (a) Monthly projections of revenue to be collected from each source.
- (b) Monthly projections of operating and capital expenditure from each vote.
- (c) Quarterly projections of service delivery targets and performance indicators for each vote.
- (d) A detailed capital works plan, broken down by ward.

3. REPORTING ON THE SDBIP

This section covers reporting on the SDBIP as a way of linking activities actually undertaken by the Municipality with the SDBIP and the Municipality's oversight and monitoring activities. Financial reporting is prescribed in the Local Government: Municipal Financial Management Act 2003 (Act No 56 of 2003)(the MFMA). The MFMA confers clear and supplementary reporting responsibilities on the accounting officer and on the Mayor.

3.1 Monthly reporting

Section 71 of the MFMA stipulates that the accounting officer must report, in writing, within 10 working days after the end of each month, on actual revenue accrued and spending against the budget. The "monthly budget statement" must provide detailed information on the following:

- (a) actual revenue, per source;
- (b) actual borrowings;
- (c) actual expenditure, per vote;
- (d) actual capital expenditure, per vote; and
- (e) the amount of any allocations received

If necessary, the following must be explained in the monthly budget statement:

- (i) any material variances from the Municipality's projected revenue by source, and from the Municipality's expenditure projections per vote;
- (ii) any material variances from the SDBIP; and

(iii) any remedial or corrective steps taken or to be taken to ensure that the projected revenue and expenditure remain within the Municipality's approved budget.

3.2 Quarterly reporting

Section 52(d) of the MFMA compels the Mayor to submit a report to the Council on the implementation of the budget and the financial state of affairs of the Municipality within 30 days of the end of each quarter. The quarterly performance projections captured in the SDBIP form the basis for the Mayor's quarterly report.

3.3 Mid-year budget and performance assessment and report

Section 72(1)(a) of the MFMA outlines the requirements for mid-year reporting. The accounting officer must assess the Municipality's performance of the during the first half of each year taking into account –

- (a) the monthly statements referred to in section 71 of the MFMA for the first half of the relevant year;
- (b) the Municipality's service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the SDBIP;
- (c) the past year's annual report, and progress on resolving problems identified there-in; and
- (d) the performance of every municipal entity under the sole or shared control of the Municipality, taking into account reports in terms of section 88 from any such entities.

Based on the outcomes of the mid-year budget and performance assessment report, an adjustments budget may be tabled if actual revenue or expenditure amounts are materially different from the projections contained in the budget or the SDBIP. If required, the SDBIP must be modified based on the mid-year performance review. SDBIP is thus a contract that holds the Municipality accountable to the community.

4. LINKING THE IDP TO THE BUDGET

The Municipality identified 10 strategic focus areas (SFAs) based on the inputs from the community. These are:

- (a) Municipal transformation and organisational development
- (b) Democracy and governance

- (c) Social and economic development
- (d) Good governance and municipal transformation
- (e) Institutional development and transformation
- (f) Municipal financial viability and management
- (g) Basic service delivery and infrastructure investment
- (h) Good governance and public participation
- (i) Infrastructure development and service delivery
- (j) Local economic development

As shown in the diagram below the Municipality's budget is informed by the strategic focus areas (SFA's) at a corporate level. Corporate objectives with measurable key performance indicators (KPIs) and targets are identified. The business planning processes undertaken at departmental level must yield objectives with indicators and targets. The business planning process must determine what resources will be required in time for the budget process.

7. PERFORMANCE INDICATORS AND SERVICE-DELIVERY TARGETS

The service delivery targets and performance indicators for each department and the Council are shown below. The service delivery targets and performance indicators contained herein is linked to the Municipality's performance management system. If the Municipality changes the performance management system it must also make changes to the service delivery targets and performance indicators in the SDBIP. By cascading performance measures from strategic to operational level, the IDP and the SDBIP forms the link with individual performance management. This ensures that performance management at the various levels relate to one another, which is a requirement of the Municipal Planning and Performance Regulations and the MFMA. The MFMA specifically requires that the annual performance agreements of managers must be linked to the SDBIP and the measurable performance objectives approved with the budget (MFMA Circular 13). The SDBIP in essence becomes the main operational tool to translate and manage the performance objectives as formulated in the IDP. The following diagram illustrates the process.

7.1 Council and Political Office-Bearers
